📋 REKAP LENGKAP

"Undangan Digital SvelteKit + Supabase + Vercel"

(versi terbaru, 1 file simpan ke Notion)

1. Folder Tree (aktual)

```
E:\\CAMP\\WEDDIFY\\SRC
├── app.css / app.html / animasi.css
├── lib/
│   ├── types/supabase.ts      ← auto-generate, pakai Row di bawah
│   ├── templates/
│   │   ├── classic/
│   │   │   ├── +page.svelte    ← halaman utama classic
│   │   │   ├── cover.svelte
│   │   │   └── sections/
│   │   │       ├── Groom.svelte
│   │   │       ├── Bride.svelte
│   │   │       ├── GuestBook.svelte  ← form RSVP
│   │   │       ├── EventInfo.svelte
│   │   │       ├── GiftInfo.svelte
│   │   │       ├── CoupleQuotes.svelte
│   │   │       ├── Countdown.svelte
│   │   │       ├── Opening.svelte
│   │   │       ├── Closing.svelte
│   │   │       └── Footer.svelte
│   │   └── modern/ (masih kosong)
│   ├── db/supabase.ts        ← client Supabase
│   ├── ui/MusicPlayer.svelte  ← audio tag
│   └── utils/animations.js & date.ts
└── routes/
```

```
├── [slug]/+page.server.ts ← load couple & rsvps
└── [slug]/+page.svelte    ← mount template
```

2. Tabel Supabase (DDL final)

```
-- couples
id uuid PK
created_at timestamptz
slug text UNIQUE
groom_name text
bride_name text
groom_ig text
bride_ig text
groom_father text
groom_mother text
bride_father text
bride_mother text
groom_photo_url text
bride_photo_url text
ijab_date date
ijab_time_range text
ijab_location text
resepsi_date date
resepsi_time_range text
resepsi_location text
template text DEFAULT 'classic'
greeting text
quote text
bank_accounts jsonb
gift_address text
maps_url text
music_url text
quotes_json jsonb
custom_domain text UNIQUE
-- SEO meta
```

```
    meta_title text
    meta_description text
    meta_image_url text
    meta_twitter_card text
    meta_noindex bool

    -- rsvps
    id uuid PK
    couple_id uuid FK → couples(id) ON DELETE CASCADE
    guest_name text
    status text CHECK('hadir','tidak','ragu')
    message text
    created_at timestamptz

    -- galleries
    id uuid PK
    couple_id uuid FK → couples(id) ON DELETE CASCADE
    photo_url text
    caption text
    position int
    is_groom bool
```

3. Type Supabase (intinya saja)

```
// lib/types/supabase.ts  (auto-generated)
Couple  = Row<{
  id, created_at, slug, groom_name, bride_name,
  groom_ig, bride_ig, groom_father, groom_mother,
  bride_father, bride_mother, groom_photo_url, bride_photo_url,
  ijab_date, ijab_time_range, ijab_location,
  resepsi_date, resepsi_time_range, resepsi_location,
  template, greeting, quote, bank_accounts, gift_address,
  maps_url, music_url, quotes_json, custom_domain,
  meta_title, meta_description, meta_image_url,
  meta_twitter_card, meta_noindex
```

```
}>

RSVP = Row<{
  id, couple_id, guest_name, status, message, created_at
}>
```

4. Environment Variables

```
SUPABASE_URL=https://xxx.supabase.co
SUPABASE_ANON_KEY=eyJhbGc...
```

5. Fitur Sudah Jalan

- Dinamis slug → template `classic`
- Form RSVP tanpa reload
- Copy rekening
- Maps embed via `maps_url`
- Audio player via `music_url`
- Quotes carousel via `quotes_json`
- SEO meta tags

6. Next To-Do (lanjut sesi berikutnya)

- [ ] Styling ulang (Tailwind/daisyUI)
- [ ] Tambah galeri (fetch `galleries`)
- [ ] Buat template `modern`
- [ ] Custom-domain middleware
- [ ] Admin dashboard CRUD

BLOCK CODE / SECTION

📄 Panduan Lengkap Tema Undangan Digital (Tailwind/DaisyUI → Clean HTML/CSS)

Berikut rangkuman semua blok yang sudah "dibersihkan" dari kelas Tailwind/DaisyUI.

Gunakan sebagai cheat-sheet saat membangun tema di Notion atau CMS lain.

1. HERO / COVER

```
<section>
  <img src="bg-hero.jpg" alt="Background">
  <h1>Nama Pengantin</h1>
  <p>Tanggal Acara</p>
  <a href="#time">Scroll ke Detail</a>
</section>
```

2. BRIDE & GROOM

```
<!-- Bride —>
<section>
  <h2>The Bride</h2>
  <img src={couple.bride_photo_url} alt="Foto mempelai wanita">
  <h3>{couple.bride_name}</h3>
  <p>Putri dari ...</p>
  <a href="<https://instagram.com/{bride_ig}>">
    <svg>...icon IG...</svg> {bride_ig}
  </a>
</section>

<!-- Groom —>
<section>
  <h2>The Groom</h2>
  <img src={couple.groom_photo_url} alt="Foto mempelai pria">
  <h3>{couple.groom_name}</h3>
  <p>Putra dari ...</p>
```

```
  <a href="<https://instagram.com/{groom_ig}>">
    <svg>...icon IG...</svg> {groom_ig}
  </a>
</section>
```

3. SAVE THE DATE (COUNTDOWN)

```
<section>
  <h2>Save The Date</h2>
  <p>Deskripsi singkat</p>

  <div>
    {#each [{label:'Hari',val:days},{label:'Jam',val:hours},{label:'Menit',val:min
s},{label:'Detik',val:secs}] as item}
      <div>
        <span>{item.val}</span>
        <span>{item.label}</span>
      </div>
    {/each}
  </div>
</section>
```

4. DETAIL ACARA

```
<section>
  <h2>Acara</h2>
  <p>Deskripsi</p>

  <!-- Akad →
  <div>
    <h3>Akad</h3>
    <span>{formatDate(ijab_date)}</span>
    <span>{ijab_time_range}</span>
    <span>{ijab_location}</span>
```

```
    </div>

    <!-- Resepsi →
    <div>
      <h3>Resepsi</h3>
      <span>{formatDate(resepsi_date)}</span>
      <span>{resepsi_time_range}</span>
      <span>{resepsi_location}</span>
    </div>

    <!-- Peta →
    <iframe src={maps_url}></iframe>

    <a href={googleCalUrl} target="_blank">Set Reminder</a>
  </section>
```

5. KIRIM HADIAH

```
<section>
  <h2>Kirim Hadiah</h2>
  <p>Penjelasan cashless</p>

  <!-- Accordion bank →
  <input type="checkbox">
  <div>Klik Disini</div>
  <div>
    {#each couple.bank_accounts as acc}
      <div>
        <span>{acc.bank} a/n {acc.name}</span>
        <span>{acc.number}</span>
        <button on:click="copy(acc.number)">Copy</button>
      </div>
    {/each}
  </div>
```

```
<!-- Alamat fisik →
{#if gift_address}
  <div>
    <span>Atau kirim ke alamat:</span>
    <p>{gift_address}</p>
    <button on:click="copy(gift_address)">Copy</button>
  </div>
{/if}
</section>
```

6. UCAPAN & DOA

```
<section>
  <h2>Ucapan & Doa</h2>

  <!-- Form →
  <form on:submit|preventDefault={submitRsvp}>
    <input placeholder="Nama Anda" bind:value={guestName} required>
    <select bind:value={status}>
      <option>Hadir</option>
      <option>Tidak Hadir</option>
      <option>Ragu</option>
    </select>
    <textarea maxlength="300" bind:value={message}></textarea>
    <button type="submit">Kirim Ucapan</button>
  </form>

  <!-- List Ucapan →
  <div>
   {#each ucapans as ucapan}
     <div>
       <img src="<https://ui-avatars.com/api/?name={ucapan.guest_name}
>...">
       <span>{ucapan.guest_name}</span>
       <!-- status icon →
```

```
      <p>{ucapan.message}</p>
      <small>{formatRelative(ucapan.created_at)}</small>
    </div>
   {/each}
  </div>
</section>
```

7. QUOTE / CLOSING

```
<section>
 <img src="/fl-el.webp" alt="decoration">
 <p>{couple.quote}</p>
</section>
```

8. FOOTER

```
<section>
 <p>
   Weddify made with <Heart fill="red" /> by
   <a href="<https://instagram.com/karsadigital>">KarsaKasual</a>
 </p>
 <p>© 2024 - {currentYear} KarsaKasual. All Rights Reserved</p>
</section>
```

9. GLOBAL JS / SCOPE

```
// fungsi helper
function formatDate(dateStr) { /* ... */ }
function formatRelative(ts) { /* ... */ }
function copy(text) { navigator.clipboard.writeText(text); }
```

10. CARA PAKAI

1. Salin blok HTML ke Notion → Embed → Custom Code → Paste.

2. Tambahkan CSS sendiri (inline / file terpisah) untuk font, warna, jarak, layout.

3. Ganti semua variabel Svelte `{…}` dengan data statis atau CMS API.

4. Jika tetap pakai Tailwind, tinggal restore kelas yang sudah dihapus.

Selesai!
